Status Report for the Carson River Deer Herd Telemetry Study (submitted 2/16/12)

Bids for satellite collars has been completed. A purchase order is being processed. The list of proposed frequencies will be sent to radio support for approval once the purchase order has been generated.

Met with Dr. Pam Swift to order supplies for sampling kits and drugs. Discussed the capture plan and appropriate form to use for capture.

Will continue to order supplies for the capture which will start at the end of May if the weather allows access.

Paperwork to approve a scientific aid position has been initiated and waiting for supervisor's signatures. We are attempting to find a vehicle for the scientific aid to use in order to carry out the project objectives.

Revised Itemized Cost Analysis for fiscal year 2011/12

FY 11/12			
ITEM DESCRIPTION	QUANTITY	Unit price	TOTAL
Iridium satellite collars	10	\$2,250.00	\$22,500.00
Peripherals (receiver, cables, batteries, etc)			\$11,120.00
Airtime fee (\$30/mo/collar) for one year	10	\$300.00	\$3,600.00
1 year worth of airtime	10		\$220.00
